Identity federation workshop at TIIME conference

Interested in the topic of identity federation? Your NGO could run its own identity server and federate with fairlogin and other NGOs. This way we can build an ecosystem of distributed identity servers, independent of facebook or twitter accounts. There is a specialised [workshop](#)

on 5-6 February in Vienna - please register until 15 Dec for gratis entrance. Also the other parts of the conference are worth looking at and low priced.

board.net upgrade

Writing text together: [board.net](#) is the choice for many for meeting minutes, task lists, guest lists and idea creation. "During the fair.coop summercamp the joint editing tool board.net has been heavily used to plan cooperative work areas and develop them to the next level!" says Chris, who is an active contributor to the fair.coop movement and had hosted the summercamp in the [Decentrale](#) community house at Mont Soleil in the swiss alps.

Testing fairlogin with the FairCoop community

A brief update on our Single-Sign-On project "fairlogin": We have keycloak running at id.fairkom.net and created a fairlogin realm. We migrated users into the LDAP and are now connecting one service after the other.
