

FairCoin

[Deutsch](#) | [English](#)

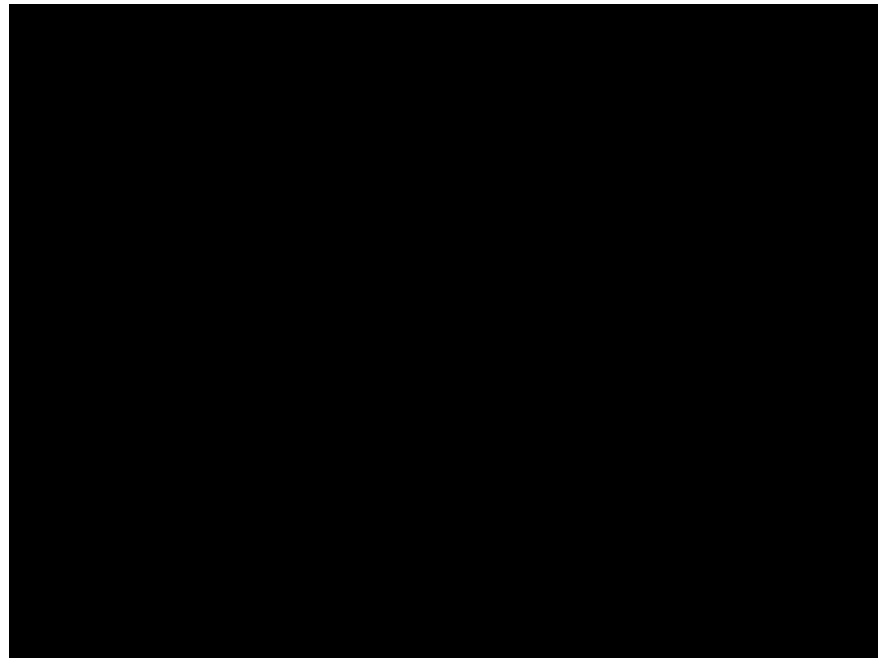

Building an economy based on cooperation

Enabling Equality and a Fair Economy

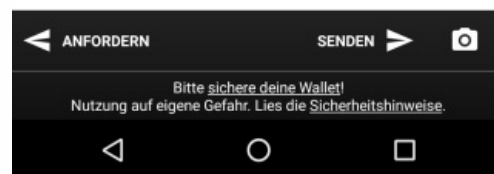

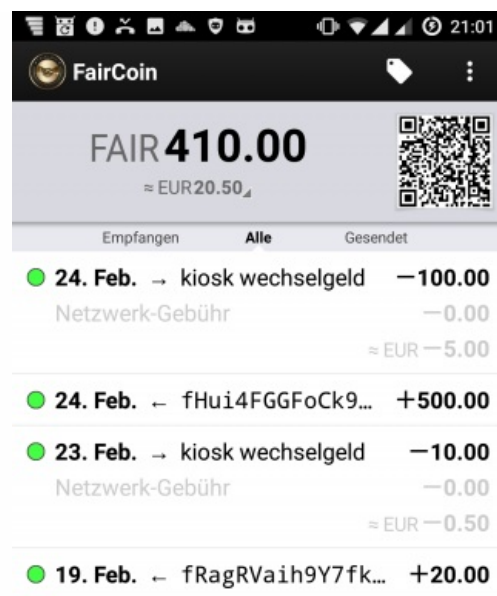

FairCoin is a digital currency supported by a global cooperative grassroots movement.

With the support of [FairCoop](#), FairCoin implements fair value exchange on a global level. By implementing the Proof-of-Cooperation innovation in 2017, FairCoin will become the most ecological and resilient cryptocurrency.

- Ecological: very low power consumption for transaction control
- Safe: Certified Validation Nodes
- Fast: transaction confirmation each three minutes
- Ethical: supports fair business values
- Future Safe: some blockchain parameters are adjustable by design
- Strong: high commitment by several cooperatives worldwide

freedom can be easy with cooperation

Referenzen:

Robin Hood of the banks

Enric Duran

The "Occupy Movement" taught us much about inequality. With faircoop, he has taken the lead to build an ecosystem for a global alternative economy. FairCoin is the currency, they prefer to use in all business relations.

Towards a more fair society

Maro

What I feel is that with Faircoin, and for the first time in our history, we the people have the opportunity to choose by ourselves what kind of economic system we want freely and that remains in our hands.

Building a grassroots economy

Michalis

FairCoin is liberating people from the modern global economic system which rules almost every aspect of our lives.

Real values

Ursina

With faircoin I will support people who are caring for the earth, nature, animals and humans and I have a better feeling, by supporting this.

Exciting dedication

SFKLS

"The dedication you all put into this is very exciting.

Fast transactions

Loose Records

I just transfered some FairCoins to make a payment,faster than a bank transfer, I was sending a message to the receiver to say i just transfered it and the guy allready received it. am getting to really love faircoop´s tools.

FairCoin is really hard to fork

Neil Haran

FairCoin is one of the only cryptos now that is incredibly hard to hard fork (because it is hard to hard fork a global grassroots movement or a cooperative community).
