Works with

Group and team communication for the 21st century.
The Open Source way.

HumHub is a free social network software and framework built to give you the tools to make communication and collaboration easy and successful.

It's lightweight, powerful and comes with an user-friendly interface. With HumHub you can create your own customized social network, social intranet or huge social enterprise application that really fits your needs.

Boost your business, support your customers, teach your students or organize your football club. It's on you.

Meet the benefits

OPEN

HumHub is completely open- source. Take advantage of the work already done and even improve it. Every suggestion or help is welcome.

FLEXIBLE

With a powerful module system you can extend HumHub by using third party tools, writing your own or connect existing software.

SECURE

Your server, your data, your rules. HumHub is a self-hosted solution and runs on almost every server. You are in the full control of your data.

SERVICES

We don't leave you alone. We support you with your projects and provide professional services around HumHub.

Social communication like you know it already

Communicate like you already do in other social networks, just with your own rules. Write posts and updates, share files, like and comment just the way you want it.

Say hello to "Spaces"

The communication in HumHub works with spaces. A space can literally be anything, a project, a group or just a simple topic. For every space you can invite multiple users and make up your own access rights and rules.

Your digital V-Card

Extend your profile, create your portfolio, connect with other people, find the right person with special skills, inform your followers with updates on your own wall and and and...

Unlimited possibilities

With modules you can modify anything on HumHub. Spaces, Profiles and other things according to your requirements. Anything you are missing on other social networks, you can build it.

Some modules are already in our Marketplace, which you can install on-the-fly in HumHub.

Get

Be amongst the first to know about upcoming features

SUBSCRIBE

See all standard features

NOTIFICATIONS

Well informed about things related to you

and people like you

"I am drupal developer. Provide openatrium, exoplatform customized solution for collaboration. But testing HUMHUB for a few hours and I am fall in love with HUMHUB."

Gavy Gill

"I am for a longer time on researching enterprise social networks. HumHub really looks like it can rock the closed source and even the open source world. Go on!"

Markus Söth

To cut a long story short, do the math!
Give it a try now.
