Welcome to the FairShares Wiki V2.x/V3.x

On these pages you will find information created by founders and members of the FairShares Association about the FairShares Brand and Model (V2.x/V3.x). The FairShares Model is a set of protocols, design principles and model constitutions for co-operative (http://www.identity.coop) social enterprise development. For documentation on the FairShares Model v1.2, please contact the FairShares Association for access to archive materials.

To return to the FairShares Association website click on www.fairshares.coop (http://www.fairshares.coop)

Background (go here to find out how the FairShares Model developed)

FairShares in Practice

The FairShares concept is applied to practice through the FairShares Brand and FairShares Model. This Wiki is maintained by members of the FairShares Association to assist member and public education. These technical pages provide in-depth information on the inner workings of the FairShares Model and the Model Articles of Association that put it into practice. To obtain further support, you can become a FairShares supporter (http://www.fairshares.coop/subscriptions.html) and network with other supporters. If you work for, or agree a Social Licence with, the FairShares Association or Social Enterprise Europe, you will be able to apply for membership of the FairShares Association. You will then be able to talk directly to Founder members when adapting the model to specific country and industry contexts.

All FairShares enterprises are co-operative enterprises.

Social purpose
ethical trading under
democratic control
