

Record and share your terminal sessions, the right way.

Forget screen recording apps and blurry video. Enjoy a lightweight, purely text-based approach to terminal recording.

Start Recording

Supports Linux, Mac OS X and *BSD

```
> # See how easy it is to record a terminal session
> # First install the asciinema recorder
> brew install asciinema
==> Downloading https://homebrew.bintray.com/bottles/asciinema-1.2.0.el_capitan.bottle.tar.gz
#####
==> Pouring asciinema-1.2.0.el_capitan.bottle.tar.gz
  /usr/local/Cellar/asciinema/1.2.0: 5 files, 9.31
> # Now start recording
> asciinema rec
~ AsciiCast recording started.
~ Hit Ctrl-D or type "exit" to finish.
bash-3.2$ # I am in a new shell instance which is being recorded now
bash-3.2$ sha1sum /etc/f* | tail -n 10 | lolcat -F 0.3
da39a3ee5e6b4b0d3255bfe95601890afd80709 /etc/find.codes
88dd3ea7ffcbb910fbd1d921811817d935310b34 /etc/fstab.hd
442a5bc4174a8f4d6ef8d5ae5da9251ebb6ab455 /etc/ftpd.conf
442a5bc4174a8f4d6ef8d5ae5da9251ebb6ab455 /etc/ftpd.conf.default
d3e5fb0c582645e60f8a13802be0c909a3f9e4d7 /etc/ftpusers
bash-3.2$ # To finish recording just exit the s
```

asciinema *[as-kee-nuh-muh]* (from English ASCII + from Ancient Greek κίνημα (*kínēma*, “movement”)) is a free and open source solution for recording terminal sessions and sharing them on the web. Read about how it works (</docs/how-it-works>).

Simple recording

Record right where you work - in a terminal. To start just run `asciinema rec`, to finish hit `Ctrl-D` or type `exit`.

Get started » (</docs/getting-started>)

Copy & paste

Any time you see a command you'd like to try in your own terminal just pause the player and copy-paste the content you want. It's just a text after all!

Embedding

Easily embed an asciicast player in your blog post, project documentation page or in your conference talk slides.

See the embedding docs » (</docs/embedding>)
