SYNTECHBIO

BIOHACKER SPACES NETWORK

Our mission is to support Biohacking and DIY-Bio initiatives in the regions that need access to these technologies, enhancing the communication and action of the worldwide community as a group.

The SyntechBio Network already includes the groups from Argentina, Brazil, Colombia, Chile, Ecuador, Ghana, Mexico, Peru and Spain. The network has two international advisors with broad experience in building Biohacker Spaces; Maria Chavez from Biocurious and Ryan Bethencourt from IndieBio-SF.

Join us! together let's talk about ideas that will change the world.

[Build your BioHacker Space](#)

Our online community of 4000+ science lovers and tinkerers is a space for technological and social advances in DIY-Bio, Synthetic Biology and Biohacking.

Our vision is to improve access to biohacking and synthetic biology in the regions that most need it. We believe that biological

engineering will power the technological revolution that will help us to make a better world.

"When you feel that you should have been born in the future, the only option is to build the future, so you can finally get to where you belong". Andrés Ochoa - 04/2014.
